Search Engine Optimization Settings

? Use apache mod_rewrite URL rewriting?

yes ▼

Format for category rewriting: {CATID}/{PAGE}/

Format for member link list rewriting: lists/{CATREWRITEPATH}-{CATID}/{PAGE}.html

Format for member link list index rewriting: lists/

Format for link details rewriting: games/detail/{LINKID}

Format for outgoing links: games/{LINKID}/

Format for member list:

Format for profiles: memberlist.php?action=profile&id={MEMBERID}

Replace spaces with -   (must be unique)

Replace ampersands with ampers (must be unique)

Use only lowercase? no ▼

Rewrite Other Specific URLs:
Place one on each line. Example: Make sitemap.php work rewritten as sitemap.html

Make the normal URLs   work rewritten as

Other .htaccess content:
If you want anything else in your .htaccess, write it here and it'll be placed near the top.

Auto-write .htaccess?
If you're an advanced user who wants to use a complicated custom .htaccess you might wish to turn this off.
no ▼

Serve noindex/nofollow notices for all non-rewritten URLs?
This can prevent landing in google's supplimental index, but will also limit the number of pages indexed to o
those where rewriting applies.
no ▼

? Default meta tags:
Meta tags and other header insertions for anywhere except categories that have their own specified. Edit a
category to set category meta tags.
